### **STORY LINES**

#### STARTING FIVE

- Baylor is going for its fourth-straight win at Cincinnati on Tuesday. The Bears' current three-game win streak is the longest for BU since starting the year a perfect 14-0.
- With two games remaining in the regular season, Baylor is currently tied for fifth in the league standings with lowa State and is one game behind fourth-place West Virginia. The top four seeds in the Phillips 66 Big 12 Championship earn a double bye.
- With the 66-65 win at then-No. 22 West Virginia on Saturday, the Bears picked up their league-leading sixth top-25 win of the season. Baylor is one of just five programs in the country with six wins over ranked foes.
- For the second-straight game, the Bears held their opponent to 17.6% from behind the 3-point arc on Saturday. Baylor ranks 11th nationally, and second in the league, in three-point percentage defense (26.1%).
- In her first 46 games as a Bear, **Jana Van Gytenbeek** turned in just three double-figure scoring performances, and in her last six games, she has finished in double figures four times, including in the pair of wins last week.

### **SIGNATURE WINS**

- Baylor is one of five Division I programs in the country with six AP top-25 wins this season.
- The Bears are the only Big 12 program with six wins over ranked opponents.
- Baylor has signature wins over Utah, Miami, Texas, TCU and a pair over West Virginia. Two of those victories were top-five wins by the Bears.
- South Carolina, NC State, UCLA and UConn are the only programs in the country with six AP top 25 wins.
- Behind BU, Kansas State, Oklahoma and Texas are the only other schools in the Big 12 with at least four victories against ranked foes this season.

### STACKING WINS

- The Bears won their third-straight game at West Virginia on Saturday, sweeping the two-game series with the Mountaineers.
- The win streak is the longest for BU since starting the year a perfect 14-0.
- In that span, three Bears are averaging double figures led by Dre'Una Edwards' 11 points per game off the bench, while Darianna Littlepage-Buggs (10.3) and Sarah Andrews (10.0) follow closely behind.
- Littlepage-Buggs (8.0) and Aijha Blackwell (8.3) are leading BU on the boards in the last three contests and Jana
   Van Gytenbeek has dished out a team-leading 11 assists.
- In its last three games, Baylor is shooting 44.4% and holding its opponents to just 19.6% from behind the 3-point arc.
- In the win over Texas Tech at home on Feb. 18, the Bears held the Lady Raiders to just 32 points equaling the worst scoring output for TTU in program history, also scoring 32 vs. Oklahoma in 2014.
- The Bears' bench outscored Kansas', 35-0, on Feb. 21 marking the most bench points allowed by the Jayhawks this season and the second-most points scored by the Baylor reserves in a Big 12 game this year.
- Additionally, the win over Kansas marked the 20th of the season for Baylor. The Bears have turned in 24-straight 20-plus win seasons which marks the second-longest streak in the country behind UConn (31).
- Baylor's most recent win at West Virginia helped the Bears pull off their second two-game sweep of a conference opponent in three tries as the Bears earned their league-high sixth top-25 win of the year.

#### **REBOUNDING MACHINES**

- Baylor is 17-1 this season when outrebounding its opponents, including 9-1 in Big 12 action.
- Baylor's 52 rebounds at Houston (Feb. 4) and 45 boards at Oklahoma State (Jan. 28) were the most by the Bears in Big 12 games this season.
- Aijha Blackwell has led the Bears in rebounding 11 times this season. She has finished in double figures on the glass in nine contests this year and seven times in Big 12 play.

### **SHARING THE SUGAR**

- Baylor ranks 11th in NCAA Division I and second in the Big 12 in assists per game, averaging 19.0. lowa leads the country at 21.3 assists per contest while Oklahoma leads the conference at 20.7.
- Baylor has 513 assists on 762 made baskets this season (67%). **Sarah Andrews** (104), **Jada Walker** (89) and **Jana Van Gytenbeek** (67) lead the Bears in the category while all 13 players have recorded an assist.

### STORY LINES

### **SCOUTING THE SERIES WITH CINCINNATI**

- The all-time series between Baylor and Cincinnati is locked at one game apiece with both wins for each program happening at neural sites.
- The Bearcats earned a win over the Bears during the 1980-81 season in Amarillo, Texas, while Baylor leveled the series with an impressive 72-34 win in the Bahamas during the 2015-16 campaign.
- The meeting between the two programs marks the only one during the Big 12 regular season in 2023-24.

#### **SEASON SWEEP OF THE COOGS**

- Baylor used a 23-point victory to sweep the two-game series against Houston on Feb. 4, charging past the Cougars, 83-60.
- The 23-point win marked the fourth 16-plus point victory by Baylor in Big 12 action this season.
- With her fourth rebound of the game, Aijha Blackwell hit 1,000 rebounds in her career.
- Baylor moved to 15-2, and 60-6 in the **Nicki Collen** era, when leading at the half.
- Yaya Felder contributed 14 of BU's 28 points off the bench, leading the Baylor reserves for the second-straight game.

#### GIDDY UP

1974-75

- Baylor bounced back on the road, powering past Oklahoma State, 72-60, on Jan. 28.
- Four Bears finished in double figures led by **Dre'Una Edwards**' 16-point outpouring. She has led BU in scoring in three contests this season.
- Bella Fontleroy contributed 15 of BU's 27 points off the bench, going a career-best 6-for-6 from the charity stripe.
- Aijha Blackwell had a massive game on the glass, finishing with a season-high 19 rebounds. Her 19 boards were the most by a Bear in a game since NaLyssa Smith recorded 20 against lowa State on Feb. 28, 2022.

### **GOOD KNIGHT**

- Baylor outlasted the UCF Knights, 77-74, on Jan. 20 at Foster Pavilion to jump back in the win column after a pair of losses at Kansas (Jan. 10) and Iowa State (Jan. 13).
- The Bears played in front of their second-largest crowd of the season and at the new facility with over 5,000 in attendance.
- Baylor shot 50% (27-of-54) from the floor as a team and moved to 18-1 in the **Nicki Collen** era when shooting 50% or better from the field. Additionally, Baylor is 266-2 all-time when shooting at least 50% from the floor.
- Darianna Littlepage-Buggs finished in double figures for the eighth time this season with her second-career 20-point outing matching a season-high 24 points.
- · Aijha Blackwell turned in her fifth double-digit rebound outing this year, and third in four games, with a season high 13 boards.
- Sarah Andrews dished out a season high 10 assists, finishing in double figures in the category for just the second time in her career. She added 11 points for her second-career double-double.

#### **AMONG THE BEST**

- The Naismith Basketball Hall of Fame and WBCA announced last week that **Sarah Andrews** and **Dre'Una Edwards** are top-10 candidates for the Nancy Lieberman Award and Katrina McClain Award, respectively.
- Andrews is the only individual from the Big 12 represented on the Nancy Lieberman Award list and Edwards is one of just two from the league.
- Andrews, who earned a spot on three preseason watch lists, including the Nancy Lieberman Award, has started all 27 games for the Bears this season.
- Edwards has started 25 games for the Bears this season and she has reached double-figure scoring in a team-leading 20 of 27 games this season.

#### **SEASONED SARAH**

- Sarah Andrews was a unanimous preseason All-Big 12 selection and brings back the most experience in a Baylor uniform.
- She is the only Bear to have played more than two seasons at BU.
- The two-time all-conference pick averaged a team-leading 14.7 points per game in 2022-23 and eclipsed 1,000-career points in Baylor's win over Southern on Nov. 6 to start the year, becoming the 40th player in program history to accomplish this feat.
- She ranks second all-time in BU women's basketball history with 223 made 3-pointers. Odyssey Sims holds the record at 258.

### **NUMBERS TO WATCH**

- Newcomer Jada Walker is 67 points away from 1,000 in her career.
- Sophomore **Darianna Littlepage-Buggs** is seven rebounds shy of 500 career boards.
- Senior **Sarah Andrews** is 61 assists away from 500 in her career. If she reaches this milestone, she will be just the fifth player to reach 500 in program history.

### **STORY LINES**

#### **HOT START**

- The Bears pieced together their best start to a season since the perfect 40-0 season put together by the 2012 national championship team, starting the year at 14-0.
- With BU's undefeated record in non-conference play, it marked just the fifth time in program history that the Bears have gone perfect in non-con action since the turn of the century. The other seasons were: 2000-01, 2001-02, 2011-12 and 2015-16. Additionally, it marked the sixth time entering Big 12 play unbeaten, doing so in the 2005-06 season as well.

#### **TAKING DOWN TEXAS**

- Baylor's 85-79 conference-opening win at Texas on Dec. 30 marked the 14th-straight win in Austin for the Bears.
- The win marked the Bears' second top-five win of the year after a non-con victory over then-No. 4 Utah.
- The last time Baylor picked up two top-five wins in the regular season was during the 2012-13 campaign, beating No. 3 UConn and No. 5 Notre Dame on the road.
- Baylor forced Texas to commit 23 turnovers the most in a game by the Longhorns this season and the most in a Big 12 game since turning the ball over 24 times at Oklahoma on Jan. 29, 2022.
- Baylor's nine 3-pointers were the most given up by the Longhorns this year. Senior **Sarah Andrews** went a team-best 4-for-8 from deep and moved into second all-time at Baylor in made 3-pointers.

#### **KEEPIN' IT 100**

- Baylor used an 80-point win to take down McNeese on Nov. 24 at the Ferrell Center. The 124 points scored by the Bears in the 124-44 victory were the most in a game in the Nicki Collen era and most since notching 136 against Northwestern State on Dec. 18, 2020. Additionally, it ranked fifth all-time in points recorded in a game by BU.
- It was just the eighth time in program history Baylor had put up 120-plus points, including overtime games.
- The team combined for 17 3-pointers, surpassing the previous record of 15 made 3-pointers set against Arkansas State on Dec. 18, 2019. The Bears were 17-for-32 (53.1%) and moved to a perfect 7-0 in the Collen era when shooting 50% or better from range.
- Baylor dished out 43 assists as a team the second most in program history and were led by senior Jana Van Gytenbeek in the category with a career high 12 dishes.
- As a team, Baylor grabbed 68 rebounds, which sits just outside the top-five all-time in program history. Of the 68 boards, 34 of them were offensive, marking the most since at least the 2014-15 campaign when the Bears recorded 35 in a win over Prairie View A&M.

#### NATIONALLY RECOGNIZED

- After Baylor's wins over Utah and Harvard, the Bears were recognized as the U.S. Basketball Writers Association (USBWA) National Team of the Week on Nov. 21.
- The Bear's were recognized for the second-straight year and second time under the direction of head coach Nicki Collen. In 2022-23, Baylor was recognized as the USBWA National Team of the Week after a pair of ranked road wins at Oklahoma and Kansas.
- Senior **Sarah Andrews** was recognized as the ESPN National Player of the Week on Dec. 18 for her performances against Delaware State (Dec. 14) and then No. 24 Miami (Dec. 16). It marked the second time in her career the guard has been given a weekly national honor from ESPN.

#### **UPSETTING THE UTES**

- Baylor, ranked No. 21 in the AP Top 25 Poll at the time, defeated the then-No. 4 Utah Utes, 84-77, at the Ferrell Center on Tuesday, Nov. 14.
- The victory marked the first Big 12 win versus a top-four opponent since Kansas State topped No. 4 lowa, 84-83, on Nov. 17, 2022, and the Wildcats have since had one, knocking off No. 2 lowa on Nov. 16.
- Baylor's win over the Utes marked the Bears' first top-four win since beating No. 1 UConn, 74-58, on Jan. 9, 2020, and it was the first top-four win at home since beating the Huskies, 68-57, on Jan. 3, 2019.
- The 84 points scored by the Bears are the most against a top-10 opponent in a regular-season, non-overtime game since scoring 87 at No. 9 lowa State on Feb. 28, 2022. Additionally, it's the most points scored against a top-five opponent in the regular season since netting 94 against No. 2 Notre Dame on Nov. 20, 2011.
- The win marked the highest-ranked victory for head coach Nicki Collen in her head coaching career and she moved to 3-3 all-time against top-10 foes.

#### STARTING STRONG

- The Bears earned their 14th-straight season-opening victory on Nov. 6 against Southern, powering past the Lady Jaguars, 85-53, at the Ferrell Center.
- Baylor's matchup with Southern marked the 14th-consecutive year the Bears started their season at home. Baylor has won 19-straight home openers, dating back to the 2005-06 campaign.

### **BACK IN THE RANKS**

- Baylor entered the 2023-24 season as the 19th-ranked team in the country, as announced by the Associated Press, and No. 20 in the WBCA/USA Today Top-25 Poll.
- The Bears' appearance in the preseason AP poll marks the 19th-straight season BU has been ranked to start the year.
- The Bears have been ranked in 366 of the last 375 AP Top-25 weekly polls, including 10-straight weeks to start the 2022-23 campaign.
- Baylor was one of just two Big 12 schools to be ranked in the preseason poll, with Texas joining the Bears as the No. 13 team.

### NOTHIN' NEW

- Jada Walker was voted the league's Preseason Newcomer of the Year by the conference's head coaches.
- Her selection marks the fifth-straight year a Baylor Bear has earned the preseason distinction.
- Walker joins Jordan Lewis (2021-22) and Aijha Blackwell (2022-23) as selections under the direction of third-year head coach Nicki Collen.

### **PLAYERS TO WATCH**

- Four Bears were named to preseason watch lists published by the Naismith Basketball Hall of Fame and Women's Basketball Coaches Association (WBCA) as part of the Women's Starting Five.
- For the first time in her career, Sarah Andrews landed a spot on the Nancy Lieberman Award Watch List, which recognizes the top point guards in women's NCAA Division I basketball.
- Additionally, Aijha Blackwell and Dre'Una Edwards were selected to the Cheryl Miller (small forward) and Katrina McClain (power forward) Award Watch Lists, respectively, for the second-straight year.
- Darianna Littlepage Buggs joined Edwards on the McClain Award list, marking the first-career preseason award for the returning all-conference performer.

### **ROOKIES? MORE LIKE VETS**

- A trio of Bears played significant minutes as freshmen during the 2022-23 season, as returners **Darianna Littlepage-Buggs** and **Bella Fontleroy** joined newcomer **Denae Fritz** on the Big 12 All-Freshman Team a year ago.
- The three combined for 923 points, averaging 28.0 points per game as a group.
- Littlepage-Buggs led the way with eight Big 12 Freshman of the Week honors, while Fontleroy and Fritz each earned a pair to account for 12 of the 17 weekly awards handed out by the league during the 2022-23 season.

### **HEAD COACH NICKI COLLEN • 3RD SEASON**

Nicki Collen was introduced as the fifth head coach in Baylor women's basketball history on May 5, 2021. She enters her third season at the helm in 2023-24.

In her first season with the Bears, Collen recorded the most wins by a rookie head coach in the country with 28. She helped lead the Bears to their 12th-straight Big 12 regular-season title and their

11th-straight top-two seed in the NCAA Tournament.

Collen implemented her system, which featured more perimeter shooting. Baylor went from the bottom of the list nationally to just outside the top 50 in 3-pointers made. In her first season, the Bears set new program records for 3-pointers made (233) and attempted (678).

From her introductory press conference, the Naismith Coach of the Year semifinalist said the Bears would be playing their best basketball late in the season, and she was right. Baylor became the first team to defeat a ranked opponent twice in a three-day span since 1999 when the Bears downed Texas two times to open the month of February. Two weeks later, exactly a month after sitting at the bottom of the conference standings with an 0-2 record, BU was back atop the league's leaderboard.

Collen implemented the 1-0 mentality that paid off with a 25-point win at No. 8 lowa State in front of a nearly soldout crowd of 13,000 raucous fans which clinched the conference crown. Baylor became the first team since Texas Tech in 2000 to start a Big 12 season 0-2 and go on to win the league.

After her first season ended in the second round of the NCAA Tournament, Collen saw three of her players be selected in the 2022 WNBA Draft, tying a program record. Two of them - NaLyssa Smith (No. 2) and Queen Egbo (No. 10) marked the first duo to be taken in the top 10 in program history.

Collen's first recruiting class was ranked No. 9 nationally by ESPN HoopGurlz.

In year two, Collen mentored two all-conference selections, two unanimous Big 12 All-Freshman Team picks and the unanimous Big 12 Freshman of the Year, Darianna Littlepage-Buggs. Littlepage-Buggs earned eight Big 12 Freshman of the Week awards during the 2022-23 campaign, becoming the first BU rookie to earn it eight-or-more times in program history. Additionally, she ranked second in the Big 12 all-time in freshman of the week honors.

The Bears secured 20 wins for the 23rd-straight year, which is the second-longest active streak among Division I programs behind UConn's 30-straight 20-plus win seasons. Collen led Baylor to its 19th-straight NCAA Tournament appearance in 2022-23 and 21st overall, as the Bears erased an 18-point deficit to win their opening-round game against Alabama.

Collen came to Baylor from the WNBA's Atlanta franchise, where she spent the last three seasons at the helm for the Dream. Her rookie season in Atlanta resulted in a 23-11 season in 2018, where she earned WNBA Coach of the Year honors and helped the franchise to the WNBA Playoff Semifinals.

Prior to her arrival in Atlanta, she spent two seasons under former head coach Curt Miller of the Connecticut Sun, helping the franchise improve from fifth in the East Division to second from 2016 to 2017, respectively.

Collen's collegiate coaching career spanned for nine seasons prior to her WNBA arrival. She spent two seasons as an assistant at Colorado State from 2000-2002, one season at Ball State from 2002-2003, one at Louisville from 2003-2004, three at Arkansas from 2011-2014 and two at Florida Gulf Coast from 2014-2016.

Her teams' combined record in nine seasons as an NCAA Division I assistant was 214-74, good for a .743 win percentage. As an assistant, Collen guided four different squads to the NCAA Tournament, reaching the second round in three of those seasons.

She spent six of her nine seasons as an assistant under

her husband, Tom Collen's head-coaching tenures at Colorado State, Louisville and Arkansas. She also discipled under Tracy Roller at Ball State and Karl Smesko at Florida Gulf Coast. Collen helped the FGCU program to a 64-9 record and the school's first NCAA Tournament win in her two-year tenure.

In her nine seasons at the collegiate level, Collen coached three All-Americans and saw three players selected in the WNBA Draft.

Collen's collegiate playing career began at Purdue in 1993-94, when the Boilermakers made an NCAA Final Four run with a 29-5 overall record and a 16-2 mark in the Big Ten. Her sophomore season, Purdue made another deep run with an Elite Eight appearance to go with a 24-8 overall record. She transferred to Marquette, where she tallied 421 assists in her final two seasons, averaging 7.0 per game in her last 60 collegiate games. She helped the Golden Eagles to two-straight NCAA Tournament appearances in 1997 and 1998.

Nicki and her husband, Tom, have three children, Connor, Reese and Logan. Connor and Reese are currently freshmen at Baylor.

#### WHAT THEY'RE SAYING ABOUT NICKI COLLEN

"Nicki Collen is a great hire for Baylor. A well-respected basketball mind in the WNBA, she has the knowledge and work-ethic to succeed at one of the top programs in women's college basketball.

Much like the woman who preceded her, Collen is a fiery competitor with a big personality. She is a nice fit for Baylor."

-Rebecca Lobo, ESPN Analyst, former NCAA Champion

"Nicki made an immediate impression as a head coach in the WNBA and it was a big challenge to coach against her. She likes an up tempo game, is innovative, and will bring a great style to Baylor Basketball. She is known for being direct and honest with her players in order to get the best from them on and off the court. I'm looking forward to watching her continue the great tradition of Baylor Basketball."

-Mike Thibault, Connecticut Sun Head Coach

"Nicki has a brilliant basketball mind and a tremendous ability to connect with players. Nicki is high-energy, self-motivated, and ultra-competitive. She will do great things at Baylor."

- Karl Smesko, Florida Gulf Coast Head Coach

"The Lady Bears program is always near and dear, and I am excited to see what Coach Collen will do on the sidelines in Waco. Fans can expect some fiery defensive skills for Coach C!"

- Kalani Brown, Atlanta Dream player, former Lady Bear

"I was really looking forward to working with Coach Collen in the WNBA, and while I didn't get that chance, I couldn't be happier for her to join our alma mater and lead the Lady Bears. I am excited to see her in the green and gold."

– Odyssey Sims, Atlanta Dream player, former Bear

"Today is an exciting day for Baylor University and our women's basketball program. Nicki is a passionate leader of young women and an elite basketball mind and teacher of the game. She is a great mission fit who shares in our vision of Preparing Champions for Life by commanding excellence both on and off the court. Nicki's professional experience will be invaluable to developing players for the next level. Her addition sustains our commitment to the women's basketball program at the highest level. We welcome Nicki, her husband Tom and children, Connor, Reese and Logan, to the Baylor family."

- Mack Rhoades, Baylor Vice President & Director of Athletics

"We are excited to have Nicki lead our women's basketball program, and we look forward to welcoming her into the Baylor Family. I appreciate the work of Mack Rhoades and his team in identifying our next coach who understands our commitment to an elite program, aligns with Baylor's Christian mission and appreciates how we prepare champions for life at our University. After visiting personally with Coach Collen, I can't wait to see her and our student-athletes as they represent our great University both on the court and inside the classroom as well as throughout the Waco community."

- Baylor President, Linda A. Livingstone, Ph.D

### **MILESTONES, TEAM NOTES, RANKINGS**

#### **TEAM NOTES**

- Baylor is 267-2 all-time when shooting 50 percent or better from the field and 40-0 when shooting 60 percent or higher. The Bears' last loss when shooting over 50 percent was to No. 22 Michigan on 11/27/22.
- 363 of Baylor's wins since 2010-11 have been by 10 or more points, and only 26 times in that span has its winning margin been five or fewer points.
- Since the 2010-11 season, Baylor is 48-10 vs. Top 25 opponents at home.
- Baylor is 358-114 (.761) vs. Big 12 opponents in the regular season all-time.

#### THE BAYLOR BEARS REGIME

### **2019 NCAA CHAMPIONS**

The 2018-19 Bears became just the third women's program in NCAA history to win three titles when Baylor beat Notre Dame, 82-81, April 7 in Tampa, Florida. **Chloe Jackson's** go-ahead scoop layup with under five seconds left propelled her to NCAA Final Four Most Outstanding Player honors to go along with a team-high 26 points in the game. The Bears rode the wave of two All-American posts with **Kalani Brown** and **Lauren Cox**, each earning multiple all-America honors. The pair led Baylor to its 10th regular-season and tournament champoinship in the Big 12 and **Kim Mulkey** was honored as national coach of the year by the USBWA, the Associated Press and the WBCA.

### **2012 NCAA CHAMPIONS**

The 2011-12 Bear season was as perfect as it could be. En route to claiming its second NCAA Championship in seven years, Baylor ran the table, posting an unprecedented 40-0 mark and claiming both Big 12 Conference crowns, **Brittney Griner** and Mulkey swept player of the year and coach of the year honors, earning WBCA, USBWA, Associated Press, Naismith and Big 12 Conference recognition. Baylor was ranked No. 1 wire-to-wire in both polls and raced through conference play with a Big 12-record 18-0 mark. Griner and **Odyssey Sims** were named consensus All-Americans, while **Destiny Williams** was a WBCA All-America honorable mention honoree.

### **2005 NCAA CHAMPIONS**

The squad posted a 33-3 record and claimed the Big 12 Conference title with a 14-2 mark. En route to the program's first NCAA Championship, the Bears defeated three No. 1 seeds. **Steffanie Blackmon** and **Sophia Young** were both named All-Americans. In addition to earning Big 12 Coach of the Year honors, **Mulkey** received the New York Athletic Club's prestigious Winged Foot Award.

### **NCAA TOURNAMENT STAPLE & 11-PLUS YEAR DOMINANCE**

- The Bears have made 19-consecutive NCAA Tournament appearances and 21 overall. Those appearances have resulted in three national championships (2005, 2012, 2019), four Final Fours (2005, 2010, 2012, 2019), 10 Elite Eights and 14 Sweet Sixteens.
- The Bears are 24-time Big 12 Champions— most in Big 12 history—capturing 12 of the last 13 regular season titles, 13 overall & 11 tournament titles.
- Baylor is 437-52 (.898) over the past 12 seasons while posting a 222-25 mark in Big 12 play and 29-3 in Big 12 Tournament play.
- 363 of Baylor's 437 wins since 2010-11 have been by 10 or more points, and only 26 times in that span has its winning margin been five or fewer points.

### **BIG 12 DYNASTY**

- Baylor women's basketball has won a league-leading 24 Big 12 Conference titles -- 13 regular season and 11 tournament championships.
- Baylor has run the table in the conference four times (2012, 2013, 2018, 2019). It has only happened six times in Big 12 history (Oklahoma: 16-0 in 2006; Nebraska: 16-0 in 2010).
- Baylor has advanced to the Big 12 Championship game 15 times in program history.
- The Bears have won nine of the last 12, and seven of the last 10 Big 12 Championship titles, last besting No. 17/20 West Virginia, 76-50, in the 2021 final.

### **NOTABLES**

2023-24

- Has made an appearance in all 27 games in her first season with the Bears, earning her first start at BU against Providence (12/20)
- Became the fifth Bear on the active roster to reach 1,000-career points, notching 11 against Houston (1/6/24)
- Turned in her best performance of the season, a 16-point outpouring in 16 minutes off the bench, in a 46-point win over Alcorn State (11/26). She led all scorers that game and went a game-best 5-for-6 from the free throw line
- Has reached double-figure scoring in seven contests this year
- Grabbed a season-high seven rebounds in the 80-point win over McNeese (11/24)
- Dished out a season-high seven assists before fouling out in a win at Oklahoma State (1/28)
- Accounted for eight of BU's total bench points (16) against No. 12 Texas (2/1)
- Led Baylor's bench for the third-straight game at BYU (2/7), finishing with 15 of the Bears' 25 points off the bench.

#### BEFORE BAYLOR

- 2023 All-MAC Second Team selection
- Started all 29 games she was available for as a sophomore in 2022-23
- Led the MAC with 638 total points in the regular season
- Netted a career-high 40 points against Central Michigan, while turning in five 30-points performances and 23 20-point outings
- Has two-career double-doubles

### 2023-24 SEASON

- Has appeared in 24 games in her second season with the Bears
- Dished out a career-high 12 assists and added eight points off the bench in Baylor's 80-point win over McNeese (11/24)
- Led Baylor in assists for the second-straight game, dishing out five, against Alcorn State (11/26) and turned in her fourth-career double-figure game with 11 points
- Turned in a team-high eight assists in the 62-point win over Delaware State (12/14)
- Dished out a game-high six assists in a win at Houston (2/4), leading the Bears in the category for the fifth time this season
- Went a team-best 3-of-5 from 3-point range at BYU (2/7) finishing in double figures (10) for the third time this season
- For the fourth time this season, and second time in three outings, the guard drained a trio of 3-pointers in a win over Kansas (2/21)
- Has finished in double figures more times in the last six games than she did in her first 46 games as a Bear. She has reached double digits in four of the last six

• Drained the game-winning free throws at No. 22 West Virginia (2/24) to give BU its league-leading sixth top-25 win of the season

### 2023-24 SEASON

- Named Preseason All-Big 12 after earning the unanimous Big 12 Freshman of the Year award in 2023
- Earned a spot on the Katrina McClain Award Preseason Watch List and Wooden Award Top 50 Preseason Watch List
- Has started all 26 games she has been available for the Bears this season
- Logged a season-high 38 minutes in a win over Harvard (11/19), contributing a season-high 13 points
- Turned in her 15th career double-double, and first of the season, at SMU (11/30), finishing with a team-high 24 points and 11 rebounds
- Led the Bears with 18 points in the 20-point win over Oregon (12/3)
- Grabbed a game-high 13 rebounds in the 18-point win over Miami (12/16)
- Added her second double-double of the year with an 18-point, 13-rebound performacne against USF (12/21) to end the non-conference slate undefeated
- Finished in double figures on the boards in three-straight outings heading into conference play

- Matched a season-high 24 points in a win over UCF (1/20), going a perfect 9-for-9 from the floor and adding a 6-of-8 performance from the free throw line
- Scored 15 of her 17 points in the second half at BYU (2/7) and logged her third double-double of the season with 12 boards
- Recorded back-to-back double-doubles for the first time this season in a win over No. 22 West Virginia (2/10), finishing with 14 points and 10 rebounds.

### 2023-24 SEASON

- Tabbed the 2024 Preseason Big 12 Newcomer of the Year
- Earned Big 12 Player of the Week on Jan. 2
- Has started all 27 games in her first season with the Bears
- Notched a season-high 15 points and four rebounds in her Baylor debut against Southern (11/6)
- Dished out a season-high eight assists in a win over Harvard (11/19) while turning in her second double-digit performance, finishing with 13 points
- Turned in her third double-figure scoring game in a win over Miami (12/16), pouring in 14 points and went a perfect 4-for-4 from the free throw line
- Recorded her best performance of the year at No. 5 Texas (12/30), finishing with a season-high 19 points on 61.5% shooting and finished with a team-leading four steals

#### BEFORE BAYLOR

- Played two seasons at Kentucky, including a year with former Wildcat teammate and current Baylor teammate, Dre'Una Edwards
- Member of the 2021-22 SEC All-Freshman Team
- 2023-24 Preseason Big 12 Newcomer of the Year
- Has 38 career double-figure scoring games and six 20-point performances
- Posted a career-high 24 points in the second round of the SEC Tournament, helping the Wildcats power past Alabama

### **NOTABLES**

2023-24 SEASON

- Named Preseason All-Big 12
- Earned a spot on three preseason watch lists: Nancy Lieberman Award, Naismith Trophy Award and Wooden Award Top 50
- Is one of 10 finalists for the Nancy Lieberman Award
- Named ESPN National Player of the Week on Dec. 18 for her performances against Delaware State and No. 24 Miami
- Earned the West Palm Beach Classic MVP honors
- Has started all 27 games for the Bears
- Eclipsed 1,000-career points in the win over Southern (11/6). She is now the 40th Baylor Bear to accomplish this feat
- Recorded a season-high 18 points in the upset of then-No. 4 Utah (11/14) and then matched that number with 18 points against the nationally-ranked Hurricanes
- Replaced her season high with 19 points against the Bulls (12/21) and has reached double-figure scoring 18 times this season

• Turned in her second-career double-double with 11 points and 10 assists in a win over UCF (1/20)

### **NOTABLES**

### 2023-24 SEASON

- · Has appeared in 15 contests as Baylor's lone freshman
- Made her Baylor debut in the season-opening win against Southern (11/6)
- Turned in a season-high three points in a win over Alcorn State (11/26)
- Logged a season-high 12 minutes and grabbed five rebounds in the 62-point win over Delaware State (12/14)
- Pulled down a season-high six rebounds in 10 minutes of action in a win over Houston (1/6)

#### **BEFORE BAYLOR**

- Finished her high school career at Monteverde Academy in Florida, playing two
- Was ranked No. 6 in her position and No. 36 overall in the 2023 class by ESPN HoopGurlz
- Won back-to-back GEICO High School National Championships with Montverde, leading her team as a senior with 6.6 rebounds and 1.0 blocks per game
- Helped her team post an all-time regular-season best record of 24-1 during 2022-23
- 2023 McDonald's All-American Games nominee
- Three-time member of the Brazilian national team, winning the South American Championship in 2020 with Brazil

### 2023-24 SEASON

- Named to the Katrina McClain Award Preseason Watch List for the second-straight year and was named a top-10 finalist for the award
- Put up a 20-point performance in her Baylor debut against Southern (11/6)
- Logged her first double-double as a Bear with 15 points and 13 rebounds in an 80-point win over McNeese (11/24)
- Has finished in double figures in a team-leading 20 of 27 contests this season, leading the Bears in scoring five times
- Registered a season-high four blocks in an upset of then-No. 4 Utah (11/14)
- Turned in her fourth double-digit rebound game in a 21-point win over TCU (1/3)
- Dished out a career-high seven assists in a win over Houston (1/6)
- Matched a career high with a trio of 3-pointers at Iowa State (1/13)
- Put up her second 20-point game of the season in a win over Kansas (2/21)

#### BEFORE BAYLOR

Fuer through Debermels

- Came to Baylor after three seasons at Kentucky and a rookie year at Utah
- Had to miss the 2022-23 season at Baylor due to the 4-4-4 transfer rule
- Averaged 16.8 points and 8.4 rebounds with a team-high 52.1 field-goal percentage as a junior in 2021-22
- Hit the game-winning 3-pointer against No. 1 South Carolina to clinch the SEC Tournament title for the Wildcats in 2022
- Put up 27 points that game in a 10-game stretch that saw her score 20+ six times

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | тот<br>1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 1                                                                                                                                                                                                                                                                                                                                                                                                 | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 5                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 4                                                                                                                                                       
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 5                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 4                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 7                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 5                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 3                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   
                                                                           | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 2                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 27                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 17                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
