## ABOUT TYPE 1 DIABETES

Type 1 diabetes (T1D) is an autoimmune disease in which a person's pancreas stops producing insulin, a hormone people need to get energy from food. T1D strikes both children and adults at any age suddenly. Its onset has nothing to do with diet or lifestyle. Though T1D's causes are not yet entirely understood, scientists believe that both genetic factors and environmental triggers play a role. There is currently nothing you can do to prevent it, and there is no cure yet.

## ABOUT JDRF

JDRF is the leading global organization funding T1D research. Our strength lies in our exclusive focus and singular influence on the worldwide effort to end T1D.

## VISION

A world without T1D.

## MISSION

Accelerating life-changing breakthroughs to cure, prevent and treat T1D and its complications
